

Project Ideation

Duncan Moran, Skylar Harp, Ethan Fuller, Faith Smith,
Jessica Jorgensen, Scott Kuwahara

05/03/2023

Our group met over zoom to create two mind maps, both which resulted in many detailed, creative ideas from everyone. The two central ideas were based around a UCSC interactive map and an interactive storytelling style site through a “choose your own adventure” type of navigation.

1. Animal sites on UCSC campus
2. Cool spots on UCSC campus
3. Places to study on campus
 - google maps embedded
 - noise levels, food nearby, etc
 - magazine style survey
4. Sammy spotter
 - people take pics & upload
5. UCSC scavenger hunt
 - tasks
 - quizzes
 - find things around campus & answer key word prompts to continue
 - window prompt js command
6. Site that has study spots, animal sites, and scavenger hunt
 - homepage is a UCSC decorative 2D map (like front of adventure novels)
 - animations/illustrations
 - pop-up locations that drop you into places (with google Earth)
7. Page of Buttons
 - reveal new info with each click
8. Choose your own adventure
 - psychedelic
9. Trippy Story
 - options like you're on shrooms
10. Story based off college student experience
 - interactive storytelling
11. Different perspectives from dif students
 - pov
 - different pathways

12. Scrapbook

- mini animations

13. Portfolios

- in scrapbook form

- collaborative

- subsections with each group member
